

To ensure solar modules remain secure, even in high winds, a high-quality mounting system is required. Frankensolar has the perfect solution for almost all mounting arrangements.

The TÜV certified TRIC mounting system.

Security through perfection

100% Aluminium

All key components are made of aluminum.

- Guaranteed rust free
- Lightweight
- Reduce transportation costs

Elimination of the insert nut with rigid plastic components ensures a lasting, secure connection.

Installation from the top

Groundbreaking top-down assembly

- Pre-assembled kits
- Faster connection
- Save assembly costs

A quick, easy and safe installation is guaranteed.

All in one system

Nothing can go wrong

- A roof anchor for All
- A rail for All
- A triangle for All

Together with the clamping bracket, an unbeatable team.
